

Cub Manufacturing News 8/12/2016

Welcome back to Cub Manufacturing for the 2016- 2017 school year! We have several new students in Cub Manufacturing this year. Our numbers increased from eight members last year to twelve members this year. Our team includes Daman, Coleman, Tanner, Zach, Andrew, Ryan, Braylon, Steven, Brady, Mackenzie, Chance, and Emyly - you will get to know them well!

Our new accounting/marketing team of Daman, Emyly, and Mackenzie will work together during our third period class on these aspects of our business, while the rest of the team will work on projects. However, when fourth period begins, everyone hits the shop floor to work! We are off to a fast start with lots to do and we are working hard to bring everyone up to speed.

Training:

As we bring on our first class of new students/employees, the most important thing we can do is train them properly. Everyone has started to get comfortable with a high level understanding of how each machine works and its purpose, but more importantly we are emphasizing shop safety, rules, and regulations.

The accounting team members are learning the process and what paperwork is necessary in each different function from inventory, to purchasing, to invoicing. They are working with Mr. Lamb and Mrs. Hall to understand how the accounts are set up and why it is so important to have accurate information on all documents.

Projects:

We are working with Dugle, a manufacturing company, which produces various types of products. They have hired us to design a piece they will use during their painting and molding processes.

Plasma Table:

At this time, we cannot use the plasma table as the plasma cutter has been disabled due to a malfunction within the cutter. We are working to determine the specific issue and will determine a plan for repair.

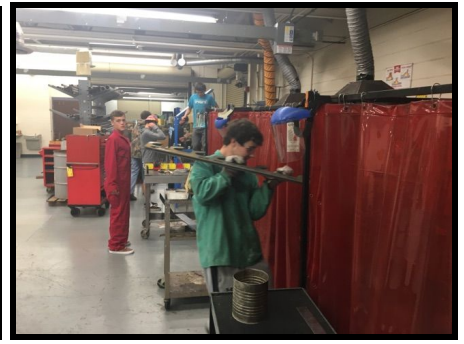

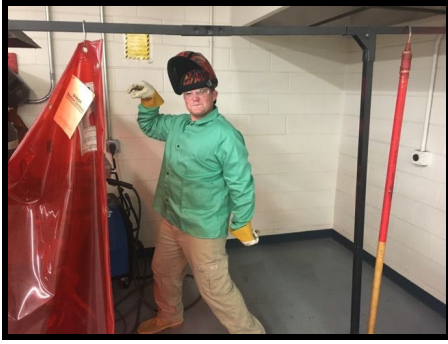

New Equipment:

We couldn't be more thankful for the continued generosity of our community!

- IKEC has donated a lathe, tool boxes, precision measuring equipment, and various other items to the shop.
- Koehler Welding Supply has once again donated several helmets, jackets, and gloves to outfit our new students with PPE (personal protective equipment).

We are very excited to be back and look forward to sharing things with you each week. Feel free to drop us a note if there is someone you think would like to be added to our weekly email list!
